

LOMBARDY REGION
REGIONAL OPERATIONAL PROGRAM 2014 -2020
OBJECTIVE "INVESTMENT FOR GROWTH AND EMPLOYMENT"
Action I.1.b.3.1

**Public presentation
of the pre-commercial procurement procedure
for research and development services aimed at developing
technological innovation to assess the coronary atherosclerotic plaque fragility**

Wednesday 11th July 2018 10.00 AM

**Sala Solesin
1st floor of Palazzo Lombardia in Milan - Entrance N4
via Melchiorre Gioia 37 - Milan**

Ischemic heart disease is one of the main causes of death in the developed countries. Nowadays, the only way to study the coronary tree is the coronary angiography examination. This invasive procedure can not be justified as a routine approach because it is not free from complications. Therefore, the innovative technology required, would make possible to fill the gap, evaluating with a non-invasive technique the plaque frailty and its rupture risk preventing the myocardial infarction. In order to compare the advantages and disadvantages of various alternative technological solutions, so as to be able to filter the technological risks before undertaking a commercial procurement, the ASST Pavia, based on the input of the Directorate General for Research, Innovation, University, Export and Internationalization of the Lombardy Region, has published a public pre-commercial procurement tender, financed under the ERDF POR 2014-2020.

The industrial and research sectors are invited to the public presentation [of the procedure in question](#), according to the following program.

10.00 am - 10.30 am	Registration of participants
10.30 am - 11.00 am	Illustration of the innovation requirements described in the Technical Specifications (IT/EN)
11.00 am - 11.45 am	Illustration of the pre-commercial procurement procedure described in the Disciplinary (IT/EN)
11.45 am - 12.00 am	Illustration of the participation requirements described in the Disciplinary (IT/EN)

The event can be followed in live streaming viewable from:
